M.Pharm Program
(Specialization in Pharmaceutical Quality Assurance)

Pharmaceutical Analysis and Quality Assurance (As per Pharmacy Council of India prescribed curriculum)

This specialization in Pharmaceutical Quality Assurance course is designed by PCI to enrich students with extensive training on pharmaceutical analysis and quality assurance with a range of modern instruments and techniques which include analysis of nanotechnology based products, biological materials and quality assurance during manufacturing and research. The students pursuing this course are placed in pharmaceutical companies dealing with manufacturing, research & development or clinical trials. Also, students may be placed in various governmental and private companies providing services of analytical research.

Excellent analytical testing instrumentation availability at Gujarat Forensic Sciences University provides students of this program an excellent learning experience.

Students also get opportunity to participate in testing consultancies provided by industries, along with regular academics.

Important subjects:

- Quality Assurance
- Advanced Analytical techniques
- Pharmaceutical Technology
